Gerab System Solutions

INSIGHT SCM SUITE

Warehouse Management System

Innovation in Logistics

Advanced WMS solutions for 3PL, forwarding, and logistics operations with complete supply chain visibility.

2–5 Months | 3PL Focused | Custom Build

INSIGHT SUPPLY CHAIN SUITE

One single Track & Trace platform

Tightly integrated, highly configurable modules encompassing the entire supply chain.

Warehousing

Complete warehouse management with real-time inventory control

Transportation

Fleet and freight management with route optimization

Distribution

Order fulfillment and distribution center operations

Open Yard

Yard management and container tracking

The SCM Suite integrates logistics functions, fulfillment center operations, and Open Yard & Warehouse Management in an easy-to-use platform — providing **real-time visibility** of your operations to help optimize your supply chain processes.

INBOUND PROCESS

Automated receiving & put-away

1. Purchase Order Management
2. Advance Shipment Notices (ASN)
3. Receiving & Inspection
4. Quality Check & Segregation
5. Product Labeling
6. Automated Put-away
7. Cross-dock Operations
8. Workload Balancing

RF-enabled receiving

Hand-held RF terminals with scanners automate inventory receipt and put-away processes — delivering accurate order fulfillment and considerably increasing efficiency.

OUTBOUND PROCESS

Efficient picking & distribution

1. Sales Order Management
2. Wave Planning & Picking
3. Pack & Ship Operations
4. Inventory Movement
5. Order Fulfillment
6. Multi-channel Processing
7. Distribution Planning
8. Load Optimization

Scan-driven fulfillment

Hand-held scanners effectively pick and pack inventory — providing accurate order fulfillment, quicker response, and boosting productivity.

TECHNOLOGY SOLUTIONS

Choose the right technology for your operation

Barcode Solution

- Cost-effective solution
- Proven reliability
- Easy to implement
- Low maintenance

Best for: item-level tracking, picking confirmation, receiving verification

RFID Solution

100× FASTER

- 100× faster than barcode
- No line-of-sight required
- Bulk reading capability
- Real-time visibility

Best for: high-volume operations, automated inventory counts, asset tracking

100×

Hybrid Approach

RFID counting is 100 times faster than barcode counting. Both solutions work seamlessly together to automate processes and increase operational efficiency — based on your specific requirements.

3PL & 4PL CAPABILITIES

Built for third- and fourth-party logistics

Complete 3PL and 4PL functionality with advanced automation and increased productivity.

Multi-Client Management

Handle multiple customers with separate inventories, billing, and SLAs

Flexible Billing

Activity-based billing, storage fees, and value-added services

Flow-Through Operations

Cross-docking and direct shipping without physical storage

Labor Management

Track productivity, performance metrics, and resource allocation

KEY 3PL FEATURES

Everything a modern 3PL warehouse needs

01

Traditional warehouse management

02

Flow-through / cross-dock functionality

03

Order management & processing

04

Quality control & inspection

05

Returns management

06

Location & storage management

07

Labor control & task management

08

Broad visibility for customers
